PROJECTS

Full Stack E-commerce Application

[Live Demo](#)

Tech Stack: React.js | Node.js | Express.js | MongoDB

- Designed and built a fully responsive React.js front-end with product listing, dynamic search, category filtering, and a shopping cart - optimized for both desktop and mobile.
- Developed 10+ RESTful API endpoints using Node.js and Express.js covering product, user, order, and payment management - stress-tested with 50 concurrent connections handling 160+ req/sec at 244ms median latency.
- Integrated 2 payment gateways (Stripe, Cash on Delivery) with JWT-based authentication for secure checkout.

Social Media Web Application

[Live Demo](#)

Tech Stack: React.js | Node.js | Express.js | MongoDB

- Built an interactive React.js front-end with post feeds, user profiles, and a Stories feature supporting image, video, and text content.
- Integrated real-time chat functionality using Socket.io for instant messaging between users.
- Developed 18+ RESTful API endpoints using Node.js and Express.js covering posts, users, chat, and media management — secured with JWT-based authentication..

ChatGPT-Inspired Web Application

[Github](#)

Tech Stack: React.js | Node.js | Express.js | LLM API | Tavily API

- Built a responsive React.js chat interface with real-time streaming responses and clean conversational UI.
- Integrated 2 external APIs — LLM for AI-powered responses and Tavily for live web search augmentation — delivering results in 733ms response time.
- Developed backend using Node.js/Express.js and used LangChain Checkpointer for persistent conversation memory — maintaining full multi-turn context across sessions..
